

WHAT IS A CORONAVIRUS?

Coronaviruses (CoV) are a large family of viruses that cause illness ranging from the common cold to more severe diseases such as Middle East Respiratory Syndrome (MERS-CoV) and Severe Acute Respiratory Syndrome (SARS-CoV).

The most recently discovered coronavirus causes coronavirus disease COVID-19.

WHAT IS COVID-19?

COVID-19 is the infectious disease caused by the most recently discovered coronavirus. This new virus and disease were unknown before the outbreak began in Wuhan, China, in December 2019.

WHAT ARE COVID-19 SYMPTOMS?

The most common symptoms of COVID-19 are fever, tiredness, and dry cough. Some have aches and pains, nasal congestion, runny nose, sore throat or diarrhea.

Older people, and those with underlying medical problems like high blood pressure, heart problems or diabetes, are more likely to develop serious illness.

People with fever, cough and difficulty breathing should seek medical attention.
